

Company name	Current market	Brief Description
Adam Stępień	Food products	<p>Company was founded in 2014. Since the start, we as a company, strive to grow and make a mark on european markets. Our passion and main market lies in broadly understood health. For past 5 years we were focused on e-commerce, increasing our shares in market month by month. We created a shop platform called Medpak(<a href="http://medpak.com.pl">medpak.com.pl</a>). We sell products like: supplements, foods, cosmetics, nursing products, ecological products for cleaning, essential oils etc. We expand our offer daily. In the past months our goal was to create our own product brand and finally focus our efforts on our products. We gathered all of your experience from different areas of our lives, and decided to create Biolavit. Few months ago we rented a new place next to Kraków, where we created a little manufacture. For the start, we bought machines to make cold-pressed oils and to pack our product into bottles. Our manufacture is up and running and we are already selling oils with a success on polish market.</p> <p>Biolavit will be a brand focused on health realted products. Biolavit will offer cold-pressed oils, essential oils, cosmetics oils, flours, pastes (like peanut), honeys, healthy and super foods, ecological and zero waste household products. We want to create products which essentially will keep your family and surroundings healthier.</p> <p>Our main competetive advantages as a company are: highly motivated people, who overcome problems. We have various experiences in a variety of business fields. We belive that learning on our own how something works is more profitable for the company than expensive outsourcing - later we share and hand down our knowledge with future employee's. That's what we did in E-Commerce, and what we plan to do in production of our own products. This process resulted in highly tuned and educated team, where we operate every aspect of a company.</p> <p>Our products main advantage will be pretty simple. We create products from raw materials. We know every aspect of a production, which results in a product we trust, eat, use and share with our families. When you connect our mission and passion, with a 5 years experience, we belive that it will have great results</p>
Aluchem SPA	Advanced manufacturing	<p>ALUCHEM is a Company located near Milan and funded in 1975 for the development, the production and the marketing of a comprehensive range of special lubricants (oils and greases), mainly of synthetic nature.</p> <p>The raw materials used are in fact Diesters, PAO, Polyglycols, Silicones which ensure, in any industrial applications, outstanding performance advantages and much longer drain intervals that more than offset their higher prices in comparison with mineral oils.</p> <p>ALUCHEM is also producing a wide range of food grade lubricants that are classified H1 by the American Organization NSF and included in their list (see <a href="http://www.nsf.org/usda">www.nsf.org/usda</a>) of products to be used in the production of foodstuff when accidental contact may occur.</p> <p>ALUCHEM is present in Italy with a nationwide organization of lubrication experts who, supported by a very well equipped laboratory, are capable to solve customers problems.</p>
AMC2 SPÓŁKA Z OGRANICZONĄ ODPOWIEDZIALNOŚCIĄ	Textiles	<p>We are the young production company called MBarry which designs and produces fashionable handmade jackets with natural genuine goose down padding. Our jackets are comfortable, original and tough. Due to usage of high-quality polish goose down we create jackets with a very good thermic isolation. Jackets are suitable for cold, frosty and windy days. Moreover they are extremely light. That increases the comfort of daily using.</p> <p>We would like to reach customers who appreciate the best quality and comfort of our jackets not only in Poland but also around the world, but first in Europe.</p>

<p><b>APULIA SOFTWARE S.R.L</b></p>	<p>Advanced manufacturing</p>	<p>Apulia is an Italian company, coming from Apulia's region and already growing nationally (we have a direct presence in Milan and partner around Italy). Born in 2014 with the union of two companies specialized in the Open Source sector, we are part, and founding partners, of Odoo Italia Network. Odoo is the best management software to run a company, with millions of happy users who work better with our integrated Apps.</p> <p>With 10.000+ apps in, Odoo covers all the needs of a business, in a one-stop solution: no more interfaces between different software are required. Odoo apps are perfectly integrated to each others, allowing clients to fully automate their business processes.</p> <p>The open source model of Odoo allows to leverage thousands of developers and business experts to propose hundreds of apps; with strong technical foundations, Odoo's framework is unique. It provides top notch usability that scales across all apps.</p> <p>Usability improvements made on Odoo will automatically apply to all of its fully integrated apps. Odoo is perfect to streamline operations in the advanced manufacturing environment (Inventory, MRP, purchase) and in every business case where IoT can revolutionize manufacturing processes and Apulia is a perfect partner to work that out.</p> <p>At the moment we only sporadically work on foreign markets, but being already part of a network will help us better exploit the potentiality of EU growth coming from this project.</p>
<p><b>AquaBioTech Limited</b></p>	<p>Bioeconomy</p>	<p>solutions and services specialized for the sector that operates. AquaBioTech Group operates with clients and projects in over 55 countries. The owner Borislav Ivanov Borisov has graduated from the Academy of Arts - Sofia, specialty "Industrial Design". He has been designing furniture since 1992. All employees of the company have the relevant experience and education. The company is engaged in the production of design products / furniture of metal, laminates, glass, MDF, etc. / . Produces projects for complete interior and exterior solutions and executes them from repair to turnkey furnishing. B-Design Ltd. executes orders throughout the country - Sofia, Plovdiv, Varna, Burgas, Blagoevgrad, Zagora and others, as well as some sites outside Bulgaria - Romania, Italy, Austria, Croatia, Ukraine, Tanzania and others. The company has performed a complete interior of cafes, bars, hotels, casinos, apartments, shops, movies, theaters and more. Apart from the interior, we also work in the field of exterior - facades, visors, railings, advertising panels. We carry out construction and construction of buildings and premises with a trained team. In recent years, B-Design specializes in the manufacture of stainless steel products. The company is a member of the Chamber of Builders in Bulgaria and Italy.</p>
<b>Bdintex LTD</b>	Textiles	<p>Bdintex is a company which specialises in the production of male, female and children shirts as well as blouses and polo-shirts. We work mainly for foreign markets, such as the German, Italian and the British markets. We work with the clients' materials, but we also sell ready products, like shirts and female blouses. For the past two years we have taken a step towards Industry 4.0. We have implemented a CAD-CAM system, which helps us make everything from creating a certain model to the end of the production stage. A part of our equipment are 9 sewing automates bought from MAICA Italy. We have 2 embroidery machines, as well as a laundry department.</p>
<b>Biotehniskais centrs AS</b>	Bioeconomy	<p>We are an innovative Latvian company and we are developing and manufacturing laboratory and pilot scale bioreactors. We create pilot scale bioreactors made of components, which can supply each of them as a product separately. We have experience in application of complex bioreactor lines for biotechnological oriented manufacturing. It was created production facilities up to 15 bioreactors, and volume up to 20 m3. Our bioreactors are equipped with patented novel magnetic drive. To ensure the compliance with GMP rules, we are using SCADA software according the requirements of 21 CFR Part 11 (document from US Food and Drugs Administration). Process control system is based of innovative model predictive control.</p>
<b>Caravela Formosa LDA</b>	Food products	<p>Our company's main activity is exporting Portuguese food and beverage products with our own brand "Formosa Gourmet". We offer high quality food products and wine from Portugal. We work only with the best producers in Portugal and we offer a selection of organic products. All our products are made of 100% natural ingredients and they meet the highest standards of food safety and quality assurance.</p> <p>We offer a unique product design with colourful and iconic descriptive illustrations to make it easy for consumers in foreign markets to understand the products and what they contain. This is especially important in markets where consumers are not used to eat these type of products. In addition to a descriptive easy-to-understand design, we offer a wide variety of educational materials such as recipes, industry facts and historical background of the products. Our products' design and educational materials have received very positive feedback from international clients during exhibitions and business meetings.</p> <p>We offer products at a competitive price point with a superior quality to similar existing products in the market, which we could verify with retailers' feedback.</p> <p>We have successfully entered Japan, Sweden, Belgium, Luxemburg and the Netherlands. As a result of our export strategy and growth plan, we have already tripled our turnover in 2019, in comparison to the previous year. Further Asian countries and regions such as China, Hongkong, Korea and Singapore are also interesting markets for future expansion.</p>
<b>CEVICA S.L.</b>	Interior design	<p>CEVICA is a company dedicated to the design, manufacture and marketing of special small-sized ceramic pieces. Our clients are usually small and medium distributors and also large companies or national and international business areas. Our product differs from the competition for its brand and quality. On our website you can find online catalog and results of projects carried out with a large number of clients.</p>

CINTAS Y PASAMANERIA, S.A.	Textiles	<p>Cintas y Pasamanería, S.A. (CINPASA) provides solutions with textile tapes to reinforce, to hold and to transport products. In recent decades, it has been one of the leading companies in Europe in the manufacturing of curtain tapes. In the process of diversification over the years, it has expanded its product range to the current offer that covers a wide range of textile tapes and cords for various uses, and complementary products.</p> <p>The beginnings of the manufacture of ruffling tape goes back to 1961 and started as a product in the parent company of the family, La Industrial Algodonera, SA. In anticipation of the expansion of this market, it was founded in 1977 Cintas y pasamaneria SA, as a firm specializing in the manufacture of ruffling curtain tapes. It was the first company in Spain to manufacture and sell automatic ruffling tapes.</p> <p>In 1980, exporting to Arab countries started and in 1993 it was started to be sold in the community market. Nowadays our products are being exported to the five continents and we exhibit at international fairs such as Heimtextil and Evtteks.</p>
COMERCIAL OVINOS S.C.L.	Textiles	<p>Comercial Ovinos is an enterprise that produces and refines wool and export it to other countries.</p> <p>Its main market is in Asia, USA and Europe.</p>
Conceria Nuvolari Srl	Textiles	<p>Conceria Nuvolari is a family company located in Italian region Marche specialized in the production and marketing of high-end and exclusive leather. Mrs. Sara Santori, its dynamic and strong-willed C.E.O, uses to say: "All the colors of the world in just one skin". Leather colored by an imagination which interprets cultures and breaks down into thousands of exciting colorful creations. Colors of an international, innovative tannery that, with passion and know-how, is able to offer refined and selected articles with an extraordinary round hand. Leather that turns into never ending emotions thanks to the most refined and demanding creativity of technicians, designers and creation teams. Goatskins, cross-bred leather for lining and upper (produced in conformity to the best protocols and leather regulations) form a world of colorful and sustainable materials which not only respect the environment but are also finished with exquisite skill: Conceria Nuvolari a synonym of ingenuity and exclusive good taste. Thanks to its structured organization, skilled staff and advanced technical-instrumental-technological equipment, Conceria Nuvolari is able to offer high quality products and therefore stands out as a fair, reliable and serious company. Despite the high standards achieved so far Conceria Nuvolari goes on investing remarkable sums in technology and research to raise the quality of its articles and to build customers' loyalty. Our productions are in full compliance with sector legislations and in particular with all regulations for the protection and enhancement of the environment.</p> <p>SKINGOAT : HYPERBREATHABLE LININ SKINGOAT® is a patent (Micropore System Natural Transpiration) that protects an exclusive processing process with proprietary technology. It is an important technological innovation aimed at achieving high levels of breathability, thermoregulation and comfort in leathers produced for the footwear sector. The technology used is totally natural and does not use any chemical. SKINGOAT® leathers are in good demand all over the world among shoe groups producing long-lasting and outdoor shoes. Our product is a goat leather for lining that enables enhanced levels of breathability without changing the traditional look of a goat lining. Breathability is really important in leather production but it is even more so in producing shoes because consumers are extremely conscious about foot care and comfort in terms of shoe breathability (perspiration, bad smell and so on). Biodegradable sheep and goat skins made with innovative tanning and finishing technologies NATURE.L® It's a completely biodegradable, versatile and performing product. Its production process guarantees a low environmental impact and a marked reduction in water disposal costs. NATURE.L® leathers are not toxic, do not pollute and are highly breathable. Allure Natural leather for upper finished by hand with the application of neutral or colored creams which add a special softness to this article. Once the shoe is in the final stage of production, it is polished by hand or with brushes to reach the desired glossy final effect. Water-proof and leather goods versions are also available.</p>
Copar - Cooperativa olivicoltori del Parteolla - Società Cooperativa Agricola	Food products	<p>The Copar Cooperative was founded in 1962 by a group of 31 farmers from the village of Dolianova, in an area of Sardegna island historically devoted to oliveculture.</p> <p>As of today Copar manages 1300 hectares, for a total of more than 169.000 olive trees</p> <p>The main products are Extra Virgin Olive Oil and table olives.</p> <p>The company main market has been historically Italy and Sardegna, with a very small proportion of export in other European countries and the main customers being the large-scale retail distribution (GDO).</p> <p>Since few years, given the high quality of the product, recognized by several awards received in international competitions, the Company is trying to switch the market to more added value targets, from GDO, that every year shrinks more the profits for the farmers, to new market targets abroad.</p> <p>To follow this strategy the Company has differentiated their products in 3 Extra Virgin Olive Oil references, adding to the Classic line a Certified "Fruttato" and a Certified "Organic".</p> <p>The Company aim is to communicate better abroad about its natural competitive advantages and to share the gifts of this area of Sardegna, called Parteolla (which means the part of the land that produces olives) vocated to the olive and oil production since the ancient Roman times.</p>

		<p>Cordero Organic S.L. is an enterprise located in the south west of Spain whose main activity is the production and the commercialization of livestock and organic lamb meat.</p> <p>We can offer products with the Halal and Kosher certifications.</p>
<b>CORDERO ORGANIC S.L.</b>	Food products	Our main objective is to sell our products abroad.
<b>DI BATTISTA SRL</b>	Interior design	Company with many years of experience in the field of cardboard processing (especially corrugated cardboard packaging).
		<p>DIMENSION is a company based in Trento, Italy, born in 2000 and developing software for the emerging mobile technologies. Our first projects used SMS as communication layer to manage sales workflows, industrial automation, business tools, developing software for phone and palm devices (Symbian, Pocket PC, Palm) for big companies and enterprises. Starting in 2008 we embraced the mobile revolution created by the iPhone, changing our business direction conceiving, designing and developing mobile apps for consumers. Today, with a staff of 15 people, we have strong expertise in mobile tourism and fintech, from traditional mobile apps for iOS and Android, to more cutting edge projects with conversational interfaces like chatbot or voice skills using Artificial Intelligences, and blockchain technologies.</p> <p>In the fintech field, our apps are used by more than 200k users daily but over 100 banks in Italy.</p> <p>We keep investing in high-end technologies and our Explora Museum guide with indoor iBeacon geolocation for MUSE Museum of Science has been featured by Apple as the first european museum to use this technology. Our project has been selected by Triennale Di Milano as their museum guide after a strict selection of national and international partners.</p> <p>At the moment we don't operate on foreign markets, but we know we have an edge in mobile applications, especially in the IoT sector applied to manufacturing, where chat bots, Artificial Intelligence, indoor geolocation skills are important for Machine2Machine communication and for automatic controls needed to enhance both productivity and security in the manufacturing processes. Those same skills can be usefully applied in the Interior Design sector, to develop new, intelligent, workplaces, furniture and homes.</p>
<b>DIMENSION SRL</b>	Advanced manufacturing	
		<p>player in homeland market in order to meet industry requirements to improve our service. Next stage is access to main markets, targeting Baltic states, Scandinavia, Poland.</p> <p>Marine oil spill pollution poses a serious threat to the ecology of the world's oceans. Thousands tons of oil are spilled into the oceans every year due to both anthropogenic causes, such as tanker accidents, rupture of rigs/pipelines or malfunctioning of oil extraction platforms, and natural events, such as natural seepage from seabed oil structures, and recently developed new application for water area pollution monitoring, including seacoast line - with a great potential and demand on the whole region of the Baltic Sea.</p> <p>By means of our technology drones will be not just flying autonomously above and around masts, but also using AI to detect objects and analyze defects in real time, collect and send data. Our solution offers the ultimate in safety, fly anywhere and operate in the toughest weather conditions. As a result, important decisions can be made immediately saving time and resources. Our keywords are Stability and Endurance, Built-in Failsafe and Top-Quality Data.</p> <ul style="list-style-type: none"> <li>✓ Extremely high-resolution multispectral data</li> <li>✓ Autonomous drone docking station</li> <li>✓ Rapid response to environmental changes</li> <li>✓ Low equipment, labor and logistics cost</li> <li>✓ Real-time actionable data powered by 4G/5G</li> </ul> <p>DronePlan unique features are:</p> <ol style="list-style-type: none"> <li>1) "All in one solution" package. Starting from resource planning, mission generation, execution and data processing till final report delivery to end customer.</li> <li>2) Implementation of fully remote drone operation (without pilot) powered by autonomous take off, landing and battery swapping system.</li> <li>3) For now, there is no competition in ecological monitoring sector (by means of drones and software for them). We see the "First on the market" strategy advantage and can provide ready-to-use solution for pollution monitoring.</li> </ol>
<b>DronePlan</b>	Bioeconomy	
		<p>EA GROUP s.c. is a key player and leader in the ovine sector as a producer and marketer of carcasses and live cattle with a total annual production of 650,000 lambs, 50,000 sheep and 30,000 goats. <b>EA GROUP S.COOP.</b>	Food products	We can sell lamb meat with Halal and Kosher certifications.

EHO SA	Interior design	<p>For many years we have promoted and implemented into production unique designs by Polish designers, including Katarzyna Jakubowska and Tomasz Orzechowski (To Do Design), Monika Elikowska-Opał and Wojciech Opał (MOWO), or Sotyrys Pantopulos.</p> <p>We have always eagerly reached for wood and other natural materials in our work. A breakthrough for us was discovering that we can use it ourselves to solve everyday problems. One of these is precisely excessive noise, which is why we have created EHØ. Combining passion and usefulness gives us the best feeling of satisfaction.</p> <p>We began searching for an idea for an acoustic panel that would enable our ears to rest yet simultaneously be pleasing to the eye. The only initial assumption was an escape from cement and glass. And that is how a panel made entirely of natural wood emerged.</p> <p>Our Target market Start selling abroad Scandinavian (Sweden, Norway, Finland, Denmark) Netherlands Germany Austria, Italy, Switzerland</p>
Encama Fabrics, SL	Textiles	<p>Our products represent us:</p> <ul style="list-style-type: none"> <li>Upholstery and Decorative Jacquards Fabrics</li> <li>Natural Fabrics</li> <li>Outdoor Fabrics</li> <li>Piqué fabric for bedspreads</li> <li>Bedsheets</li> <li>Duvet Covers</li> <li>Bedspreads</li> <li>Quilts</li> <li>Edredones</li> <li>Duvets</li> </ul>

<b>MARA S.R.L.</b>	Interior design	<p>Mara is an historical Italian company specialized in the production of innovative, aesthetic and functional systems and furniture elements for the office, community, interiors and everyday life. Rigorous and careful research, innovative and advanced production technologies allow Mara to carry out all the production phases within its production premises in Brescia: from laser cutting to welding, bending and painting. Great attention is also paid to the requirements of safety, resistance and reaction to fire and to the achievement of European certifications that allow us to propose products in tenders for public spaces: collections of tables, seating and complements distributed all over the world to furnish stimulating environments in which to live and work, improving the well-being and comfort of people.</p>
<b>Marfuse Ltd</b>	Advanced manufacturing	<p>We are a team specialized in the production of a variety of high quality interior, exterior, medical, industrial augmented and augmented reality solutions, Animations and CGI. We can be of service to any sector by presenting their products with the most innovative technologies.</p>
<b>Marina Race SL</b>	Textiles	<p>We observed the racewear market and realized that all existing products were based on the same fabrics' configuration and almost identical features. So, we decided to redefine FIA racewear. And we did it.</p> <p>We are the alternative: Our commitment is creating a new concept of FIA racewear ensuring the quality of all our products at a fair price. We are the only brand that uses our own fabrics to make our products. By owning the entire process we can be more efficient, fast and innovative. We can create products that make racing experience even better.</p> <p>TEXTILE ENGINEERING: We started working on the idea of designing FIA APPROVED clothing for pilots two years ago. All our clothing have been designed and developed with pilots needs in mind. We deeply studied the position of the driver during the race and the conditions they have to cope with. The result is new garments with new features.</p> <p>Our mission is to seek for personal, professional and economic growth of every single person. Our duty with society is give economical support to the needy. Our commitment is keep improving to ensure continuity of business.</p> <p>Quality is a must in our company. We have our own R+D LAB to subject all our garments to various quality control tests. Our development team is generating new fabrics and new combinations every week in order to find better solutions for those who share the passion for racing.</p> <p>We look for our customers satisfaction. Our company is focused on achieve better products, better service and better relations. We learn with our customers, this is why we love listen to all their requirements, complaints and proposals. Taking into account their feedback is how we can improve every day.</p>
<b>MARUTX,S.L.</b>	Textiles	<p>MANUFACTURER OF FURNISHING FABRICS AND FASHION FABRICS</p> <p>DIGITAL PRINT</p> <p>DYED FABRICS</p> <p>WOVEN FABRICS</p> <p>COATED FABRICS</p> <p>JACQUARD FABRICS</p>

<p><b>METALSUD LO GATTO SRL</b></p>	<p>Interior design</p>	<p>medium - heavy carpentry, creating artifacts on the drawing for the following sectors: petrochemicals, food, building and cement. Extends over an area of about 20,000 square meters, spread over a total area of approximately 70,000 square meters, within which they operate 173 employees divided between the various production units.</p> <p>Very important is the impact on employment in the territory if you consider that the company's workforce is made up almost entirely of staff living in the area.</p> <p>The company, however, is not one of the South's Italy industrial with more successful than others but also thanks to its sales network, it is present in the national spread widely, and also in Europe the company can count the number of 6 points of distribution in Belgium, Croatia, Bosnia and Herzegovina, Greece, Romania and Malta's island. Recently, then, with the division of the doors, is also present in Asia, through a representative office in Dalian, in Africa, thanks to a successful business partnership distribution in Tunisia.</p> <p>The company Metalsud Lo Gatto s.r.l. has a quality / price ratio very highly competitive. Over the years, in fact, the management have been made considerable investments in the automation industry that led the company to reduce the cost of production compared to the competition, while ensuring the maximum flexibility in the design phase and proposing solutions.</p> <p>In the year 2011, the company Metalsud s.r.l.® (www.ferwall.it) has acquired the shares of the company Tesio spa®. Since over 50 years even the company Tesio s.p.a. (www.tesio.com) is a specialized company, in the production of the security doors. In the range of products offered by the company there are also security shutters, used exclusively in the residential sector. These products, combined with the production of steel insulated shutters and security grilles, and the insulated aluminum roller shutters, complete the range of safety locks for outdoor use.</p> <p>Since the Year 2012, the company Metalsud sas® also is capable of providing, distributing brand FOG®, products of prefabricated type, like the frame for sliding doors retractable, designed to solve, once in work places in houses, problems in that previously would have required multiple steps and different processes.</p> <p>About the target market the residential sector is too moving ahead vigorously, witnessing a huge uptake. People are increasingly considering installing security doors when building new, remodeling or sprucing up the old space, accentuating on the right door treatment. As a result of the same, the market for security doors in worldwide is accruing pervasively.</p> <p>We're on our mainly way:  Building management companies  Homeowners  Apartment renters</p>

<b>NEXT INDUSTRIES S.R.L.</b>	Advanced manufacturing	<p>Next Industries' mission is to improve the Internet of things (IoT) ecosystems and add value to its users and environment. We currently live in an era where more "things" are connected to the internet than people. The gesture control wearable technology is at the beginning of the IoT revolution, where day-to-day devices can connect and interact over the internet.</p> <p>Currently, the smart wearables market is facing "the wearable gap" created by lack of universal connectivity and poor accuracy. Next Industries simplifies the man-machine interface and is readily accessible to users of all ages and backgrounds, ranging from computer novice to technology-savvy.</p> <p>Our gesture controllers are versatile, open source tools equipped with an AI algorithm, to increase performance in gesture capture in any environment.</p> <p>There is a significant interest in universal gesture controllers, which depending on the technological skillset of the end user would be part of the wearable device or the IoT microcontroller makers.</p>
<b>OliveLab s.r.l.</b>	Interior design	<p>"We see light as a never ending series of possibility to create poetic and functional products"</p> <p>OliveLab is a Startup based in 2017 in Turin, Italy. Attracted by innovations, materials and new technologies, we see light as one of the most important resources of our life. The poetic but functional aspect of lighting takes us to design new products and fittings focused on the true needs of the final consumer. Putting together our creativity, ideas and experiences we apply the same rigorous attention to context, process, material quality and detail to all our creations.</p> <p>Our design process starts from light and emotions more than shape and colors.</p> <p>We are driven by the belief that lighting design is not just about light up a space but rather a way of furnishing, creating astonishment, magic and beauty. Those three themes are the foundations of our way to think light and the fittings that shapes it.</p>
<b>Ozonoex Alimentacion SL</b>	Food products	<p>Our company name Ozonoex Alimentacion S.L. was founded in 2014 since then we have had a constant growth that has led us sell more than 2 million euros in this year. We are specialized in selling our brand of energy drink "Linx Energy Drink". Our main markets are Morocco, Tunisia, Equatorial Guinea and Santo Tome and Principe. Are target markets are Algeria, Egypt, Jordan and Ethiopia. As we said our main product is a energy drink name "Linx", what makes us different is that we have very small expenses and that we apply large amounts of our benefits in advertising through social networks, which has allowed us to become really popular quick.</p>
<b>PolBioEco Polska Sp. z o.o.</b>	Food products	<p>PolBioEco Polska Sp. z o.o. A company certified by AgroBioTest No. PL-EKO-07-13901 as the producer of organic products. <b>Runoland Sp. z o.o. - Sp. J</b>	Food products	<p>Runoland company was established in 1992. We are a family company with many years of experience on the market. We are located in Góra, in dolnośląskie voivodship.</p> <p>We process fruit, vegetables and groundcover from certified agricultural farms and ecological forest areas located off the beaten track and industry.</p> <p>Our philosophy is taking care of both the incredible and delicious taste of our preserves and our customers' health. Our products undergo minimal thermal processing thanks to which they preserve high quality. The huge amounts of fruit in our products are the feature that distinguish them from our competitors' and guarantee exceptional taste and aroma.</p> <p>Ecology is not fashion or trend, but a lifestyle, caring about health and environment means looking into the future in a mature and responsible way. Are ecological products costly? Definitely not! It is an investment in our health and surely a long-term one. Change your way of thinking as well, do not seek temporary benefits!</p>
<b>Santori Pellami SpA</b>	Textiles	<p>Santori Pellami was founded in 1890 by Vincenzo Santori, a forward looking and wise merchant. Santori started selling rabbit skins and increased its trade with cheeses and salami, raw and tanned leathers, calves and bullocks. In 1920 Vincenzo's son, Giuseppe, took over the business. Always looking towards the future, gifted with excellent intuition for business and trade, Giuseppe made the small family business become a real company: the "Santori Giuseppe" company. After 1945, the company became a reference point for all the shoes companies which were then in full expansion in Italy. At the end of the '60s, Giuseppe's sons, Vincenzo and Guerriero, took over the business and the company grew up and expanded, adding leather and linings to the raw hides business. In the '70s the company grew up more and more and in 1978 changed its name to "Santori Pellami srl". A big change came in 1983, when the renowned company became the public limited company Santori Pellami Spa. From 1960 to 1990 the company was managed, throughout all its transformations, by the brothers Vincenzo and Guerriero, who gained a reputation on the market for correctness, reliability and excellent service for the customers. Between 1990 and 1995, Vincenzo e Guerriero's children entered the firm: Giuseppe, Andrea, Carlo and Sara, who are currently managing the company. They all were raised in the atmosphere of the family business, they were nourished by their parents' experience and advice, they have been trained on the field and for these reasons now they run the company with passion, constantly looking for innovation.</p> <p>Today, Santori Pellami is specialised in the production and sale of leathers. The Santori family's wish is to make their company always more competitive, and to make it a leader in the sector. The goal of the Santori Pellami company is to offer a product that always meets the expectations of every customer. The main elements on which the company is based are: excellent quality-price ratio; prompt delivery; the certainty, for the customer, of always receiving the desired product; continual innovation; respect for the environment.</p>
<b>Sauliaus Remeikos dizaino studija</b>	Interior design	<p>Saulius Remeika Design studio was established in 2004. <b>Smartimport SRL</b>	Food products	<p>Smartimport is an Export Management Company specialized in promoting premium food and beverage from the island of Sardegna (Italy) abroad, with a special focus on APAC countries. We worked as Export Manager for a group of medium/small producers that want to export the excellence of Sardinian food but do not have the strengths and skills to carry it out by themselves. Our main products are ExtraVirgin Olive Oil, Evoos based dressings, Vinegar, Marine Salt, Special bread and dry pasta, bottarga (dried fish' eggs), cheese, oil preserved vegetables, olives, honey, wine and spirits.</p> <p>Smartimport usually buys from the producers, build a tailored marketing and commercial strategy and find the right sales channel to deliver the products.</p> <p>We think we have a competitive advantage from the nature and the quality of the products itself and from the original and still unknown Sardinia story-telling.</p> <p>We also think we differ from other EMC because we are directly involved in the success of the products . When we select a product we directly invest on it, financially and commercially, and we take all responsibility for its commercial success.</p>
<b>Tabit Ltd.</b>	Food products	<p>We are a family-owned manufactory from Otwock in the Mazowsze region, where we have perfected the art of making noodles for 25 years. Our flagship "Bartolini" brand is successfully gaining increasingly broader recognition both in Poland and abroad. Rich experience, continuous technological development, passion and ingredients of the highest grade from trusted suppliers are a guarantee that we will achieve a good product by combining innovation with very high quality.</p>
<b>Texfire textils tècnics SL</b>	Textiles	<p>Texfire supplies textile products for the protection against fire and high temperatures. We work in the investigation, innovation and development to offer different protection products to the market aimed to different sectors.</p> <p>Texfire products are designed under European and American guidelines and regulations. Our team analyses and designs the most appropriate fabrics for direct risk in the countryside or workplace, and later, they design and develop products that offer the best protection. In Texfire, we try to cover our clients needs by offering the chance to produce our products tailored and customized. We love to listen and counsel them because giving a solution to their needs is our motivation.</p> <p>In Texfire we design, manufacture and commercialize a complete Technical Fabric's catalogue, developed to protect spaces or people in specific situations, where risks derived from fire, high temperatures, high mechanical exigences or acoustic insulation needs appear, among others. We have a lamination rolling mill, a technical weaving and our own laboratory where we daily develop quality tests and at the same time it let us investigate with new materials appearing in the market.</p>
<b>URBAŃSCY sp. z o.o. sp. k.</b>	Food products	<p>Urbanscy is an experienced confectionery manufacturer with over 30 years of tradition. The offered range of products includes: wafers, cream fudge, truffles and wide range of cookies. One of the key export products are wafers, available in two flavors: caramel and caramel with cocoa. What makes our wafers different? Our wafers, unlike all others on the market, are not crispy. They are soft, delicate and wet. The second key product we export is traditional polish cream fudge with mild, milky taste. We also offer a wide range of packaging sizes for every need - from attractive impulse products to bulk packaging. The company focus on export activity and it represents 95% of the company's revenues. In our business, we focus on meeting the growing expectations of our clients, which we realize through constantly expanding assortment, meeting delivery times, price discipline and preferential discounts. We work with commercial networks, importers and wholesalers in the country and abroad. We meet all technological requirements that apply to food production. The integrated quality management system including IFS and HACCP certificates helps us maintain the high level of our products. We also offer the possibility of producing kosher confectionery products.</p>
<b>Vesselino Ltd.</b>	Food products	<p>Our main activities are concerned with export.</p> <p>We are supplier in bulk of natural raw materials with Bulgarian origin for production in cosmetic, tea and pharmaceutical industries. We export our products for more than 42 countries abroad.</p> <p>Our ranges of products include: dried medicinal herbs, herbal extracts, essential oils and floral waters.</p> <p>We are producer of innovative and functionality products - rose water for drinking - healthy natural and carbonated drinks.</p> <p>We always try to provide our clients with promptness, quality and proficiency.</p>
<b>Wastly srl</b>	Bioeconomy	<p>Wastly is an innovative startup founded in 2015 in Cagliari by private investors. Wastly platform is aimed at manufacturers, collectors, transporters and intermediaries, recovery, disposal and recycling plants, municipalities and citizens.</p> <p>Wastly is a web portal that is used to market Secondary Raw Materials (SRMs) deriving from waste recovering and recycling. The aim is to disintermediate the process of purchase and sale of the SRMs through the digitalization of the B2B commercial chain, promoting fruitful contacts between SRMs producers and manufacturing industries that use SRMs in their production processes.</p> <p>Wastly promotes and encourages the closing of recycling chains in line with the new directives of the circular economy package.</p> <p>Wastly is a meeting point for companies dealing with waste collection and transportation, intermediation, waste recovery and recycling thanks to a certified network.</p> <p>Wastly promotes and encourages the closing of recycling chains in line with the new directives of the circular economy package.</p> <p>Wastly is a meeting point for companies dealing with waste collection and transportation, intermediation, waste recovery and recycling thanks to a certified network.</p>
<b>WESTERN CO S.R.L.</b>	Bioeconomy	<p>Western CO., founded in 1984 by Giovanni Cimini and Bruno Olivieri, is an Italian company that has more than 30 years of experience in the photovoltaic market and in industrial electronics. Western CO. products are present all over the world and satisfy the needs of a very heterogeneous clientele in terms of culture and economic potential.</p>

<p>WSA Angelika Olsza</p>	<p>Textiles</p>	<p>YEYE NATURAL</p> <p>We are a manufacturer of 100% natural, cotton sauna outfits for ladies. We have noticed that many times cultural preferences affect personal nudity tolerance and we have created a solution which gives women the sensation of freedom, while ensuring comfortable, yet minimal coverage, which is best for the overall sauna experience. The design is well thought through and "battle-tested", the materials behave really nicely throughout the product lifecycle and handle exposure to heat and humidity without any noticeable impact. All components are 100% natural and offer a sensation of soft touch and protection plus what is important, all units are hand made in Poland (EU). The customer's opinions are very positive and we believe that now, after the initial local launch, it is time to market the sets on a much wider scale across Europe. Consequently we are seeking partnerships with potential representatives. You can find a few sample pictures of our product line attached. Upon your request we can provide all additional needed details and a complete presentation with a business proposal.</p>
